A Note from the Breeder

Dear Limousin Enthusiast,

It is with great pride and absolute heartfelt excitement that Xourel welcomes you to our SECOND PRODUCTION SALE.

Few people truly understand what it means to make a herd part of your entire life, what it means to be absolutely assured that someone has given every part of their being to achieve that which they hold so dear. At Xourel there is only one way of living... and that is giving every bit of ourselves to bring you the best we possibly can! For Xourel there is just one way of living and breeding cattle – being totally committed and focusing on what truly matters.

Xourel's core business view is seeking steadfast long-term relationships – we have said this on so many occasions. Relationships that stretch over generations, because only when our grandchildren still do business together, will we know that what we did today, had both parties' best interests at heart. Xourel knows in order to achieve this dream of, relationships stretching from ages to ages, something like equity and trust is non-negotiable and forms the basis of all interactions. Only through bringing these views to their full glory, may we continue to stroll so close to God's creation ... For all of us at Xourel it is a true privilege and honor to be Gods custodians for this special herd and the truly exhilarating Golden Breed.

Seedstock farming is something that isn't brought about in a moment – only through years and decades of notorious and vigorous application of different key aspects, will one achieve a pre-set goal. When it comes to genetics, things are seldom exact. Xourel understands that managing genetics is an ongoing process and must constantly be manged. Only through the use of the correct genetics at the right time, will a goal be achieved. It is from this that Xourel aims to manage our genetics through constant evaluation of where and with what each of our clients are involved, only then can we make appropriate recommendations and apply services accordingly. Investing in genetics is a longterm thing, especially in cattle farming. Xourel understands that the genetics you use today, will only pay-out in a year or six from now and that is why we aim to breed animals that have economic traits in mind. Only through economic trait selection can we increase our clients' profit.

One can seldom express the feeling that one gets when you know that what you are doing today ... will still be recognised for generations to come. It is when you have this feeling, that you are truly building something extraordinary... *Cattle breeding is more than just a lifestyle, it's a legacy ... Thank you for sharing in our legacy ...*

May we continue to build lasting relationships, may we constantly contribute to your prosperity, may we build this beautiful breed so that our children can say that we truly did our part and may we do all of this in God's grace.

Thank you for every contribution ... words can never be enough.

Limousin Greetings.
The Xourel Team

Xourel Nala - arguably one of the most special efforts we ever put out!

Xourel Nala is the first Xourel Savuti female progeny to be made available to the market. She embraces everything that we want in a female heifer. She's got exceptional length, she's got a good stride, a lot of femininity and an endless display of possibility! Being bred off Xourel Savuti she carries the potential of a world class bull mixed with the integrated genetics brought about by the outcross genetic bull, Summit Payday. Xourel Nala's dam, Xourel Just a kiss, was one of our favourite females in the 2020 crop - she's a medium framed cow with one hell of a wedge. Xourel Nala was by far one of our favourites in the 2024 group we sell her with a heavy heart but also with pride and enthusiasm for that which she will produce in years to come. Artificially inseminated with Mr. America 709G and followed up with Xourel Tanganjika(Lot 9). Show and embryo prospect. Don't miss out on her!

She carries a lot of finesse mixed with subtle notions of soft femininity, exclaimed prior soft fleshing. She is polled, long, sleek and an absolute beautiful specimen of what we seek in the limousin heifer.

The first Xourel Redwood genetics to go on sale! We all projected Xourel Redwood to be a predominant female breeder and you sure did not disappoint. Xourel Rosewood mixes modern genetics with trusted middle of the road genetics. Her dam was bred by mixing lines like: La Rhône Escape, Xourel Meisiekind and FN0160.

What an absolute powerhouse of a bull!!

This is Xourel Imola!! Bred from Xourel Italia - the two time national grand champion bull. Ladies and gentlemen, he is thick, exceptionally strong over the hindquarters, carries tremendous length of body and displays an exceptional amount of muscularity seldom seen in a beef bull.

Xourel Imola was by far the most early maturing bull in our 2021 group. Two years of age he already displayed all the masculinity properties he carries today. Within the breed today, we seek bulls like him - early maturing, easy fleshing and medium framed. This is the type of genetics that the entire cattle industry in Southern Africa seek.

Xourel retains a semen share.

Ladies and gentlemen - what a block of a bull!!! He delivers no other statement than absolute power!!

Xourel Kunene was the main herd sire at Xourel for the past 3 years! This is pure proof of our trust in his genetics!

His sire, Xourel Caprivi(XRL16123) was sold to Essie, Black Diamond and Bon Chance Limousins where he left a long-lasting legacy. Caprivi's progeny dominates our Kalahari Client base! Xourel Kunene's dam XRL1826 is one of our best Xourel Spook daughters, having serviced in our Embryo program and continues to deliver some of the best progeny in our herd!

Kunene is strong framed, easy fleshing with lots of masculinity!

Proven genetics one seldom finds in the open market! We trust his genetics unconditionally. Xourel retains a semen share.

This bull lies very close to the Xourel Teams heart!

Xourel presents a genuine medium framed bull. He carries his beef low and deep and carries a train load of that beef! Xourel Tanganjika is arguably exactly what we seek within the limousin breed depend penetrate the broader commercial market. He is deep, full bodied, smooth coated, soft fleshed bull that carries himself exceptionally well.

Xourel Tanganjika represents everything that we hold, dear here at Xourel. He combines truly some of the base lines that we have to offer. His sire Xourel Kilimanjaro was a Rainmaker son with truly exceptional depth of body. Was bred to Xourel Nikita, a Ferrari daughter, who was arguably the best female in our 2016 group. We combined him with the special lines of Xourel Caprivi and Xourel Constance, which was the dam of Xourel Savuti. Maternally, he represents everything we seek in a limousin.

It is with a sad heart, but absolutely joy Xourel make this piece of pride available to the stud market. Xourel retains a semen share.

On Dam's side Tanzanië boasts with Lines like Summit Payday and Romn Justice! His dam Xourel Bluemoon is also the dam of Xourel Enzo (Sold to Mutanda farms in 2024)!

Dis Dam's reproductive figures tells a production story like few and his EBS's makes one excited beyond measure! He was used in the Xourel herd! Xourel retains a Semen share.

Thickset, long bodied bull with soft muscling and a strong impressive head! Being bred to Liambezi, a Caprivi son, he resembles a lot of the characters of his grand sire La Rhone Humbug! Liambezi's dam is also an embryo bred cow which was a special blend of Ferrari and a cow called Xourel Billabong. Billabong was a Summit Payday AI calve to HV0965 which was arguably one of our top 3 cows in the 2016 group! She unfortunately died, but she gave us XRL1847 which is still leaving her mark! Liambezi was sold to Devlan Limousins on our 2024 sale.

We really enjoy this young bull!

Xourel retains a semen share.
